

## TIDA Skills Course Coming to YOU!

TIDA recognizes the cutbacks everyone is making and limiting the number of seminars employees are attending. With this said, we would like to offer the Skills Course to come to your facility and educate your adjusters and attorneys\*. The Skills Course is the best and most cost effective way for less experienced adjusters and attorneys to learn skills from a faculty of experienced adjusters, attorneys and experts.

The Skills Course is designed to teach critical thinking skills, with real world scenarios, so attendees can readily apply their knowledge to their respective disciplines. Some of the topics to choose from are DOT Regulations & Compliance, Basic Accident Reconstruction, Cargo Claims, Negligent Hiring and Utilization of Independent Adjusters. The course will follow the life of an under ride crash. Participants will learn key strategies in all areas for the successful handling of trucking claims.

The advantage of the Skills Course coming to your facility is to maximize the opportunity in educating more of your employees without them being away from the office.

This one day course, at your facility and for up to 30 people, can be customized from a list of lectures. The cost for the In-House Skills Course is \$5,000. Share the cost by inviting another local TIDA company/firm to attend.

You supply the participants and location, and TIDA will supply the faculty and course materials.

Contact the TIDA office at 847-647-7226 for more information. A mutual date to be set based upon the faculty's availability.

\* The target audience is claims professionals and attorneys with 1-3 years experience. This includes claims staff from trucking companies, insurance company staff, independent adjusters, third party administrators, attorneys and paralegals.
